PROFESSIONAL SUMMARY

Integrated M.Sc. Computer Science (Data Science) student with hands-on experience delivering 3+ full-stack and AI-powered applications, spanning Python, machine learning, and end-to-end web development. Skilled at translating client requirements into production-ready software across 3 independent projects and 1 client-facing internship. Seeking a software development role to apply technical expertise while continuing to grow as an engineer.

TECHNICAL SKILLS

- Programming Languages: Python, Java, C, JavaScript, SQL, HTML5, CSS3.
- Frameworks & Libraries: Flask, Express.js, TensorFlow, Keras, Scikit-learn, OpenCV.
- Data Science & AI: Machine Learning, Deep Learning, Data Analysis, Data Visualization, Data Preprocessing, Model Evaluation.
- Databases: MongoDB, MySQL, SQLite.
- Tools & Platforms: Git, GitHub, Visual Studio Code, Jupyter Notebook, Streamlit, Tableau, Power BI.
- Core Concepts: Data Structures & Algorithms, REST API Development, Full-Stack Web Development, Explainable AI (XAI), Image Processing.

PROFESSIONAL EXPERIENCE

Student Developer / Core Team Member

St. Joseph's Next Wave Foundation *2025 - 2026*

Built and deployed 3+ websites and web applications for educational institutions as part of a core development team.
Gathered requirements directly from clients across 3+ engagements and translated them into functional features that reduced revision cycles. Collaborated with a 4-member cross-functional team across testing and deployment phases to ensure on-time, defect-free releases.

PROJECTS

MedForecast AI - Seasonal Medicine Demand Prediction

Python, Scikit-learn, Pandas, NumPy, Flask, HTML, CSS, JavaScript

Built an AI-powered web application that forecasts seasonal medicine demand using historical sales data across multiple product categories and seasonal trend cycles.
Designed a machine learning-based forecasting and purchase-recommendation engine to cut stock shortages and excess inventory for pharmacies.

HostSync - Hostel Management System

Node.js, Express.js, MongoDB, EJS, HTML, CSS, JavaScript

Engineered a full-stack hostel management platform covering 4 core modules: registration, room allocation, complaint handling, and fee management.
Implemented secure, role-based authentication and an admin dashboard that streamlined daily operations for hostel administrators.

Supermarket 2D Navigator

Python, Flask, JavaScript, HTML, CSS, SVG, REST API

Created an indoor supermarket navigation system with interactive product search and real-time shortest-path routing.
Applied Dijkstra's algorithm across a multi-aisle store layout and built REST APIs that drove route optimization and cut manual search time.

EDUCATION

Integrated M.Sc. in Computer Science (Data Science) *2022 - 2027*
St. Joseph's College (Autonomous), Moolamattom - Affiliated to Mahatma Gandhi University

Higher Secondary Education *2022*
Government Higher Secondary School, Mavoor - 75%

Secondary School Education *2020*
Government Higher Secondary School, Mavoor - 80%

CERTIFICATIONS

- Digital Marketing & Cloud Computing - KGISL / NSDC (2025)
- Data Visualization using Power BI - KGISL / NSDC (2025)
- Machine Learning Algorithm Implementation using Python - ICFOSS & St. Joseph's College (2024) Data Analytics for Beginners - St. Joseph's College (2022-2023)
- Workshop on Full Stack Web Development - St. Joseph's College (2022)
- NCC 'B' Certificate - National Cadet Corps (2024)

LEADERSHIP & CAMPUS INVOLVEMENT

Technical Event Coordinator, Film Club Coordinator, Nature Club Coordinator, NSS Volunteer, NCC Volunteer

LANGUAGES

English (Read, Write, Speak) | Malayalam (Read, Write, Speak)
